

Introducción al análisis de datos en microarrays

1. Introducción
2. Microarrays (tipos, tratamiento de las muestras e hibridación, bases de datos, aplicaciones...)
3. Normalización y análisis exploratorio (JC Oliveros)
4. Análisis de datos (Análisis supervisado y no supervisado, algoritmos...)
5. Práctica

Brief history in microarray data analysis:

Unsupervised methods

1. Clustering methods

UPGMA (Sneath and Sokal, 1973)
kmeans (Hartigan and Wong 1979)
kmedians (Hartigan and Wong 1979)
SOTA (Herrero et al. 2001)
SOM (Kohonen 1979, Tamayo et al 1999)
Gene Shaving (Hastie et al, 2000)
Fuzzy methods (Dougherty ET AL. 2002)
Probabilistic clustering (Bhattacharjee et al. 2001)
Metagenes (Pittman et al, 2004)

2. Exploratory analysis

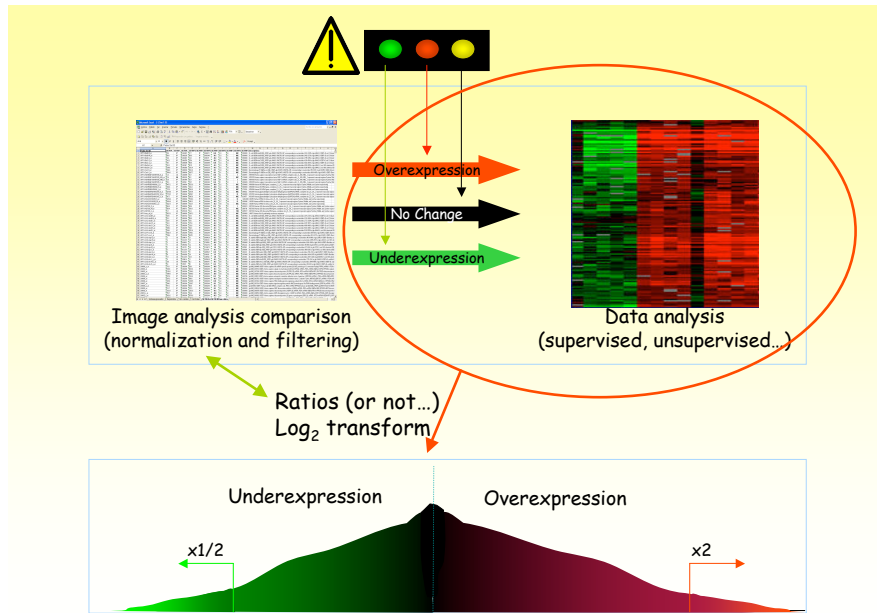

parametric: ttest, SAM (Tusher et al, 2001), ANOVA...
non parametric: Welch ttest, Wilcoxon, Kruskal Wallis...
Sumarizing datasets: PCA

3. Blocks of genes

Kolmogorov-Smirnof: GSEA (Subramanian et al. 2005)
FatiScan (Al-Shahrour et al. 2005)
SAM 3.0 (Jan 07)
GeneTrail (Backes et al. 2007)

Supervised methods (predictors)

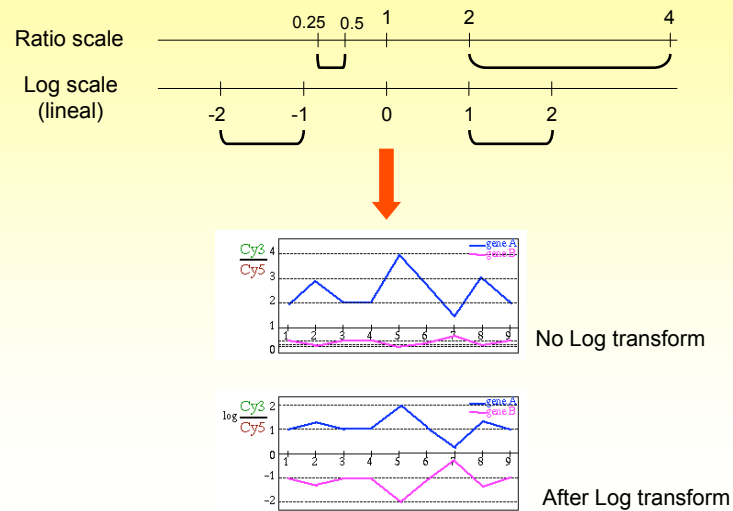

Neural networks (Khan et al. 2001)
SOMs (Kohonen et al. 1984)
KNN (Ripley 1996; Hastie et al 2001)
PAM (Tibshirani et al. 2002)
DLDA (Dudoit et al. 2002)
SVMs (Furey et al, 2000)

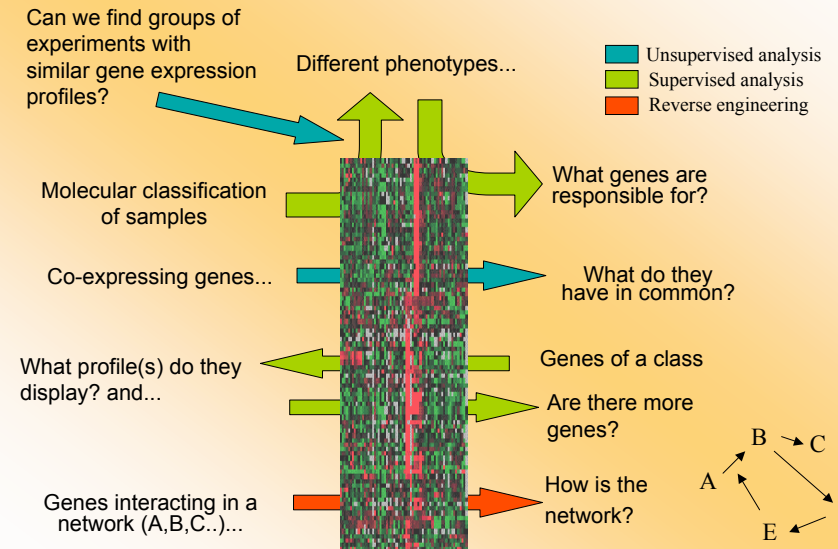

EJEMPLO

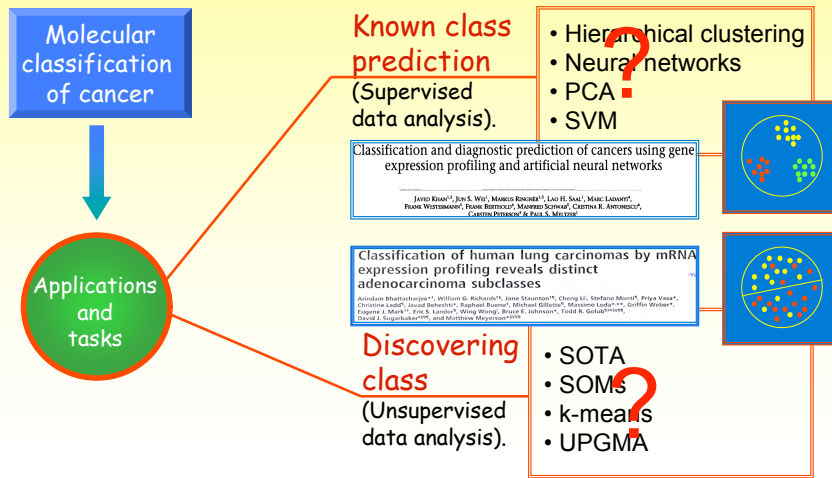

Why Log₂ transform??

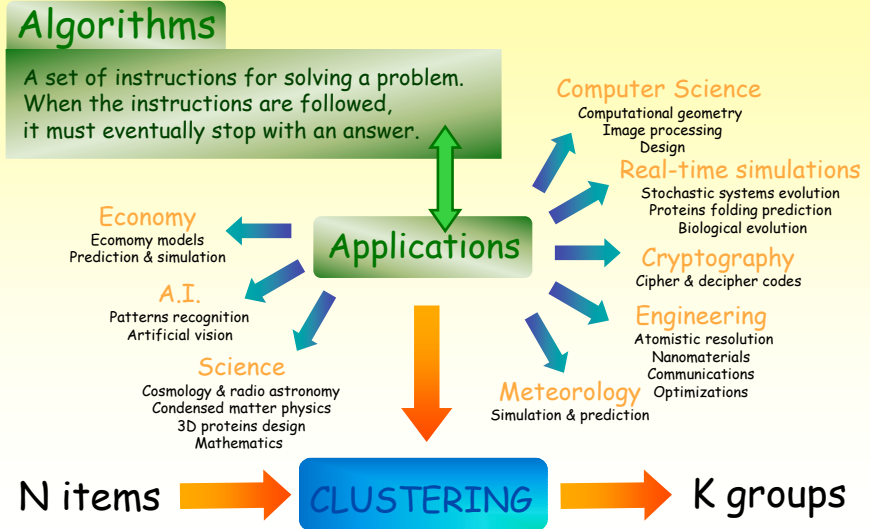

QUESTIONS & METHODOLOGICAL APPROACH

Reminding...Examples

Algorithms & clustering

Brief history in microarray data analysis:

Unsupervised methods

1. Clustering methods

- UPGMA (Sneath and Sokal, 1973)
- kmeans (Hartigan and Wong 1979)
- kmedians (Hartigan and Wong 1979)
- SOTA (Herrero et al. 2001)
- SOM (Kohonen 1979, Tamayo et al 1999)
- Gene Shaving (Hastie et al, 2000)
- Fuzzy methods (Dougherty ET AL. 2002)
- Probabilistic clustering (Bhattacharjee et al. 2001)
- Metagenes (Pittman et al, 2004)

2. Exploratory analysis

- parametric: ttest, SAM (Tusher et al, 2001), ANOVA...
- non parametric: Welch ttest, Wilcoxon, Kruskal Wallis...
- Sumarizing datasets: PCA

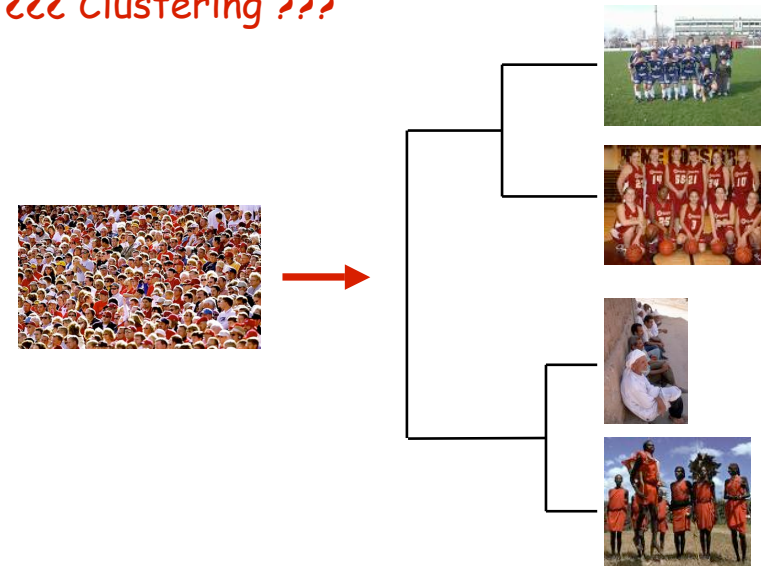

3. Blocks of genes

- Kolmogorov-Smirnof: GSEA (Subramanian et al. 2005)
- FatiScan (Al-Shahrour et al. 2005)
- SAM 3.0 (Jan 07)
- GeneTrail (Backes et al. 2007)

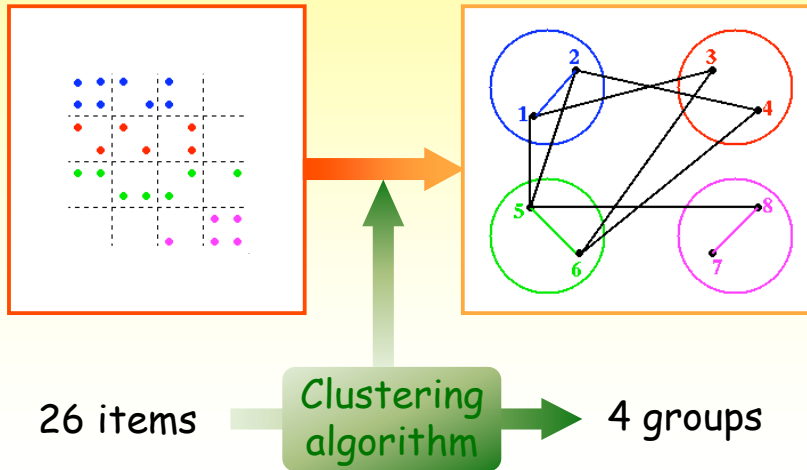

Supervised methods (predictors)

- Neural networks (Khan et al. 2001)
- SOMs (Kohonen et al. 1984)
- KNN (Ripley 1996; Hastie et al 2001)
- PAM (Tibshirani et al. 2002)
- DLDA (Dudoit et al. 2002)
- SVMS (Furey et al, 2000)

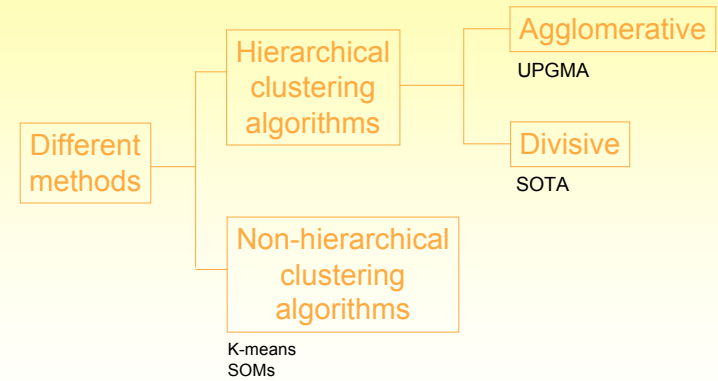

??? Clustering ???

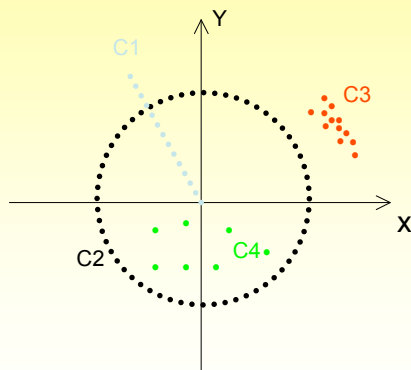

Algorithms & clustering

Algorithms & clustering

Why different algorithms?

I) Cartesian algorithm (x, y):

- a) $(X>0, Y>0) \Rightarrow C3, 1/4 C2?$
- b) $(X<0, Y>0) \Rightarrow C1, 1/4 C2?$
- c) $(X<0, Y<0) \Rightarrow C4?, 1/4 C2?$
- d) $(X>0, Y<0) \Rightarrow C4?, 1/4 C2?$
- ...
- aUbUcUd $\Rightarrow C1, C2, C3, C4.$

II) Polar algorithm (α, m):

- e) $(\alpha=cte, m) \Rightarrow C1...$
- f) $(\alpha, m=cte) \Rightarrow C2, C3?$
- ...
- g) $(\alpha, m) \Rightarrow C1, C2, C3, C4.$

There's no a perfect method...

Data analysis in microarrays

Hierarchical clustering & dendrograms

UPGMA

Unweighted Pair Group Method with Arithmetic mean

1) B y C son los dos genes más próximos (en sus medias)

2) B y C se unen y se recalcula la matriz de distancias empleando el nuevo cluster en vez de B y C. A y D son ahora los mas próximos.

3) A y D también se unen. Se reordenan los elementos para ajustar la topología del árbol. Se recalcula la matriz de distancias entre los grupos existentes

4) El proceso termina cuando el dendrograma está construido.

Distances between genes??

Metrics

- Euclidean distance
- Pearson correlation coefficient
- Spearman ρ correlation coefficient
- ...

	RNA express Gene 1	RNA express Gene 2	RNA express Gene 3
Exp 1	0.7	0.3	7.3
Exp 2	1.2	1.9	6.5
Exp 3	1.1	0.9	8.9

Example

Pearson Correlation Coefficient

Gene 1			
Gene 2	0.88		
Gene 3	-0.19	-0.62	

Niveles de Expresión

t

DISTANCIA

EUCLIDEANA

$$\sqrt{(p_1 - q_1)^2 + (p_2 - q_2)^2 + \dots + (p_n - q_n)^2} = \sqrt{\sum_{i=1}^n (p_i - q_i)^2}$$

CITY BLOCK (Manhattan or taxi cab)

$$|x_1 - x_2| + |y_1 - y_2|$$

OTRAS (Canberra, Bray-Curtis...)

CORRELACIÓN

PEARSON

$$r = \frac{\sum z_x z_y}{N - 1}$$

SPEARMAN

$$\rho = 1 - \frac{6 \sum D^2}{N(N^2 - 1)}$$

Dendrograms

Linkage methods

Average-linkage method

Single-linkage method

Complete-linkage method

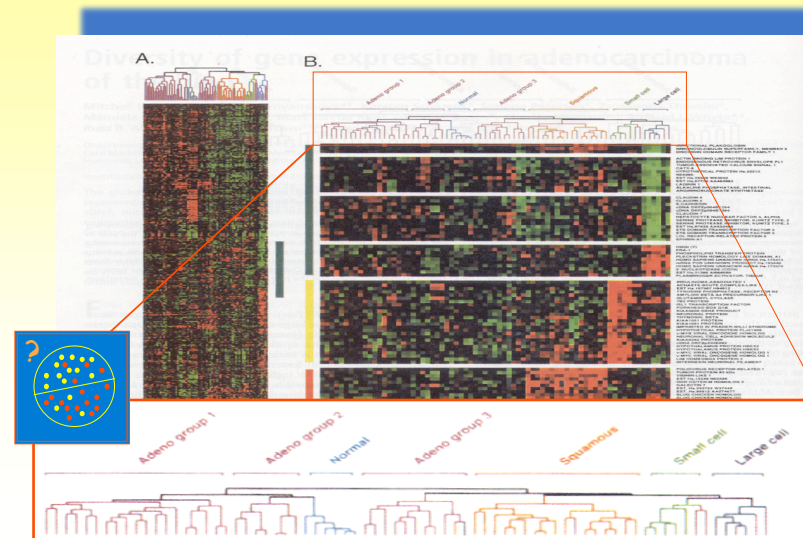

Others...

(Weighted pair-group average, Within-groups clustering Ward's method...)

Ejemplos

Hierarchical clustering - UPGMA

Garber M. E. *et al.* PNAS, vol.98, nº24; 2001.

Data analysis in microarrays

Hierarchical clustering & dendrograms

SOTA

Self-Organizing Tree Algorithm

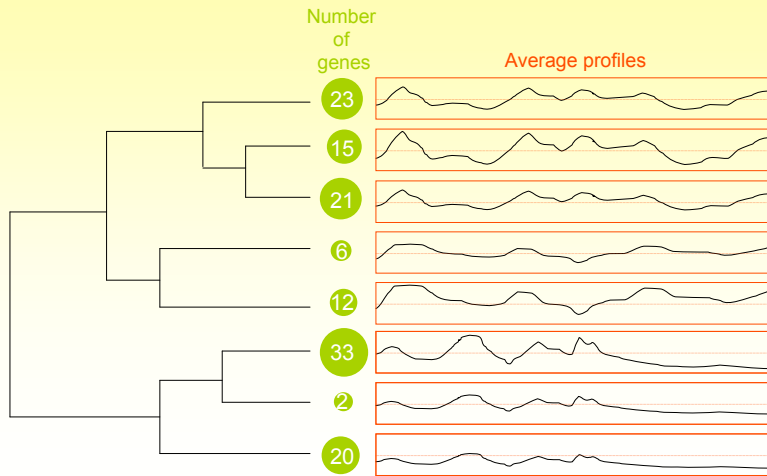

- Artificial Neural Network
- Growth from the root of the tree, toward the leaves (from lower to higher resolution)
- Threshold of resource value should be fixed
- Generation of a hierarchical cluster structure at the desired level of resolution

Herrero *et al.* Bioinformatics, 17: 126-136, 2001.

SOTA

Self-Organizing Tree Algorithm

SOTA

Self-Organizing Tree Algorithm

En nuestra práctica:
GEPAS

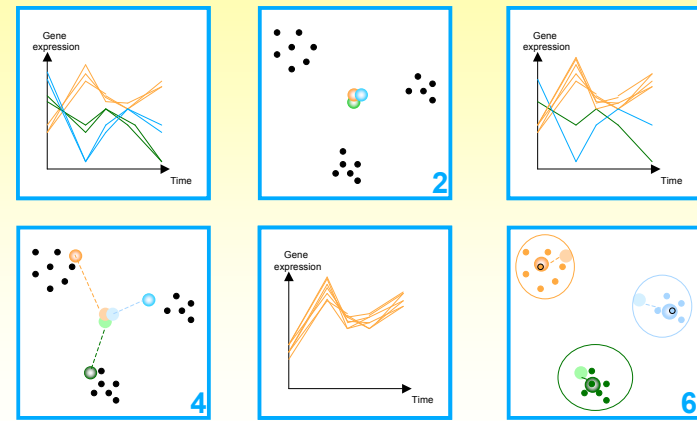

Data analysis in microarrays

K-means clustering & Self organizing-maps (SOMs)

$$J = \sum_{j=1}^K \sum_{n \in S_j} \|x_n - \mu_j\|^2$$

K-means clustering

K-means clustering

1. Compute cluster centers:

$$\mathbf{x}_{(k)} = \frac{1}{n_k} \sum_{i=1}^N I[O_i \in C_k] x_{ij}$$

2. Compute the **Euclidean Distance** of each object to the K centroids:

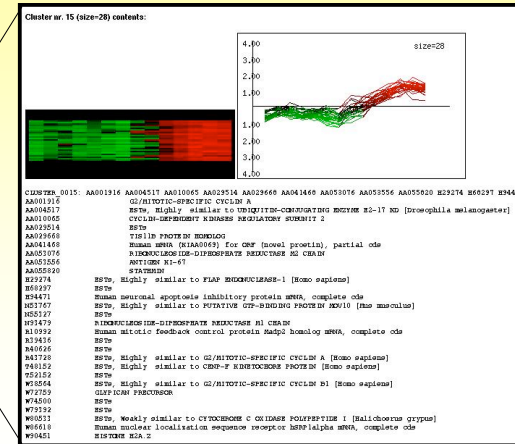

$$e_{i(k)}^2 = \sum_{j=1}^P (x_{ij} - \mathbf{x}_{(k)j})^2 = (\mathbf{x}_i - \mathbf{x}_{(k)}) \cdot (\mathbf{x}_i - \mathbf{x}_{(k)})$$

3. Reassign each object to its nearest *cluster*.

More information: <http://biodiver.bio.ub.es>

K-means clustering

Example

www.isrec.isb-sib.ch

K-means clustering

Example 2 → K=12

Exploratory analysis

Brief history in microarray data analysis:

Unsupervised methods

1. Clustering methods

- UPGMA (Sneath and Sokal, 1973)
- kmeans (Hartigan and Wong 1979)
- kmedians (Hartigan and Wong 1979)
- SOTA (Herrero et al. 2001)
- SOM (Kohonen 1979, Tamayo et al 1999)
- Gene Shaving (Hastie et al, 2000)
- Fuzzy methods (Dougherty ET AL. 2002)
- Probabilistic clustering (Bhattacharjee et al. 2001)
- Metagenes (Pittman et al, 2004)

2. Exploratory analysis

- parametric: ttest, SAM (Tusher et al, 2001), ANOVA...
- non parametric: Welch test, Wilcoxon, Kruskal Wallis...
- Sumarizing datasets: PCA

3. Blocks of genes

- Kolmogorov-Smirnof: GSEA (Subramanian et al. 2005)
- FatiScan (Al-Shahrour et al. 2005)
- SAM 3.0 (Jan 07)
- GeneTrail (Backes et al. 2007)

Supervised methods (predictors)

- Neural networks (Khan et al. 2001)
- SOMs (Kohonen et al. 1984)
- kNN (Ripley 1996; Hastie et al 2001)
- PAM (Tibshirani et al. 2002)
- DLDA (Dudoit et al. 2002)
- SVMs (Furey et al, 2000)

Currently...testing block of genes ~ biological pathways

GSEA (Subramanian et al. PNAS. 2005.)

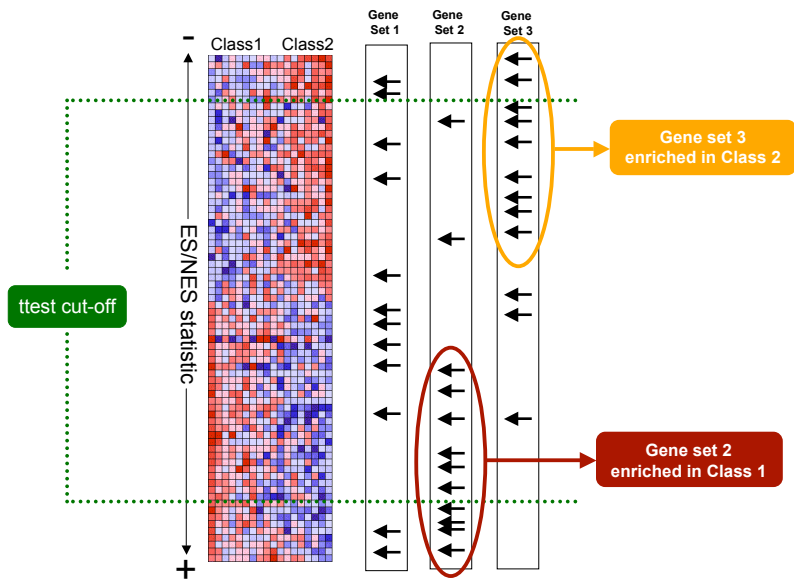

Gene Set Enrichment Analysis
Broad Institute
v 2.0 available since Jan 2007

New version includes Biocarta, Broad Institute, GeneMAPP, KEGG annotations and more...
Platforms: Affymetrix, Agilent, CodeLink, 2-color...

GSEA applies Kolmogorov-Smirnof test to find asymmetrical distributions for defined blocks of genes in datasets whole distribution.

Now...analyzing block of genes ~ biological pathways

FatiScan

Al-Shahrour et al. Bioinformatics. 2005 Jul 1;21(13):2988-93.
 Available in Babelomics suite: www.babelomics.org
 Segmentation test for searching asymmetries
 More statistically sensitive than GSEA
 Few annotations implemented

En nuestra practica:

www.babelomics.org

A discussion...

Mathematics methods for biology

Current math's methods are useful to explain real and meaningful processes from a biological point of view?

mmm...actually we don't know...sometimes they are...sometimes not

New integrative methods should be developed...

Datamining

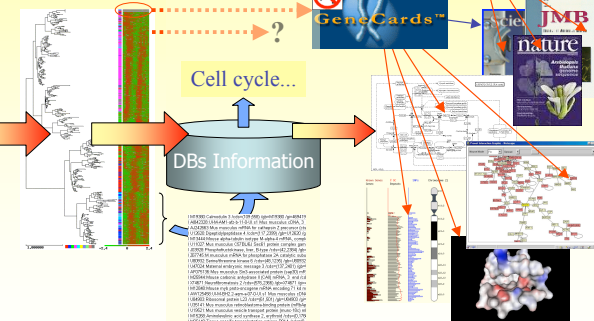

Qué es, que hace y que sabemos de este gen?

Tengo mis datos...

He analizado su estructura y "relevancia" estadística...

Que hay en este cluster?

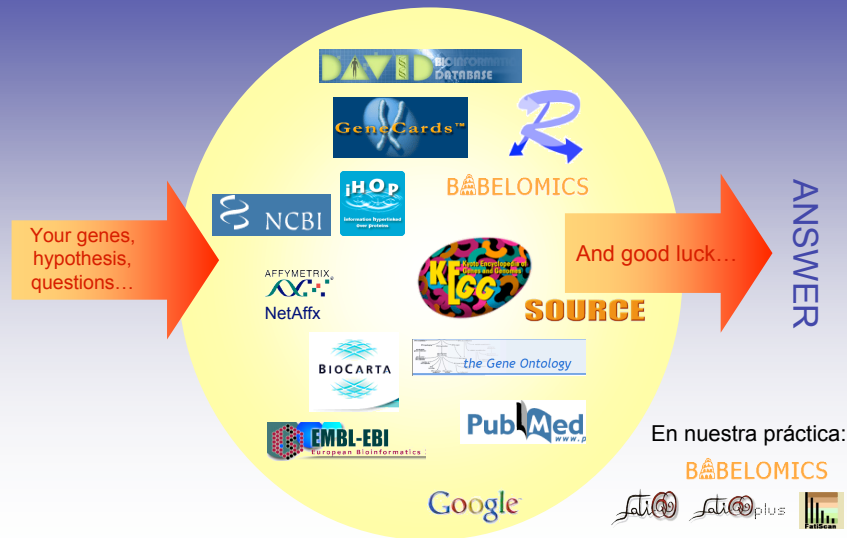

Clustering, estadística, etc
